

✓ Small compact design can fit in small areas that standard load cells cannot.

✓ Load ball or top adapter for different applications

✓ Corrosion resistant
✓ Environmental protection per IEC 529

✓ Lightweight, compression only

Standard Features

- » ASTM E74 performance: Lower Limit Factor (LLF) better than 0.01 %, Class A better than 4 %, and Class AA better than 20 % of capacity when used only in a single direction.¹
- » ISO 376 Class 0.5 from 5 % of capacity (Case C only, Case D varies by capacity)
- » Compression only
- » Capacities from 10,000–100,000 lbf, or equivalent kgf/Newton
- » Calibration to Primary deadweight standards available

1. When the directions are combined, there may be a reduction in the loading range. The reduction varies by capacity, and the Class A and AA verified range of forces could double.
